

## Mega Connector ZAK

For Profiles with 8 and 10mm T-Slots

- 1) In order to apply the ZAK mega-connector, a notch will have to be indented into the base of the relevant T-slot
- 2) The pre-assembled ZAK can now be inserted into the T-slot and can be secured tightly with the integrated screw.
- 3) Slot the top of the ZAK into the strut to be connected and secure it in the required position

### Advantages

- Easy assembly WITHOUT the need to machine-treat the struts
- Time and cost savings due to quick assembly
- Pre-assembled connector for immediate application
- Twist-proof connection (when using two ZAKs on the face side)
- Force- and form fit connection
- Can be inserted into existing structures - no need for disassembly
- Re-positionable / adjustable within an existing structure
- ESD capable
- For use with all popular profiles with a sufficiently strong core
- The number of T-slots is irrelevant
- Flexible positioning within the strut
- Patented Allfest-product
- QUICKLY – EASILY – ECONOMICALLY ASSEMBLED!

### Application

The mega-connector ZAK is intended for heavy-duty connections of aluminium sections with 8 and 10mm T-slots.

### Benötigtes Werkzeug

- Notch tool for ZAK
- Standard Allen Key SW4
